1. Увод

1.1. Коришћени програмски језици и технологије: За израду сајта коришћени су следећи језици:

PHP, MySQL, HTML5, CSS3, RESTful API (PokeAPI), JSON, AJAX, JavaScript, JQuery и његови plugin-ови (particles.js, waypoint.js).

1.2. Опис функционалности

Сајт поседује следеће функционалности:

Навигација међу странама сајта урађеног у One-page design стилу, омгоућена је помоћу PHP-а, који на основу изабраног линка из главног менија који се налази са леве стране екрана(мени се извлачи на hover), и PHP сесија проверава да ли пријављени корисник има право приступа одређеној страни и уколико нема редиректује га на одговарајућу страну, а уколико има помоћу функције include учитава се изабрана страница у постојећи index.php.

Landing Page страница поседује основне информације о садржају сајта као и дугме за логовање на сајт. У зависности од улоге корисника (може бити администратор или обичан корисник), након логовања корисник ће бити пребачен на одговарајући садржај. Администратор ће приступити администраторском панелу а корисник садржају сајта. Сви ефекти на овој страници урађени су помоћу JQuery-ja и particle.js plugin-a (https://github.com/VincentGarreau/particles.js/).

Hover ефекат на главном менију са леве стране прозора остарен је путем модификованог CSS-а. Оригинал се налази на: http://codepen.io/yashbhardwaj/pen/nqdhp.

Дизајн и ефекти на LogIn форми су омогућени модификовањем CSS-а са http://codepen.io/yusufbkr/pen/RPBQqq.

Сав остали садржај кода је оригиналан.

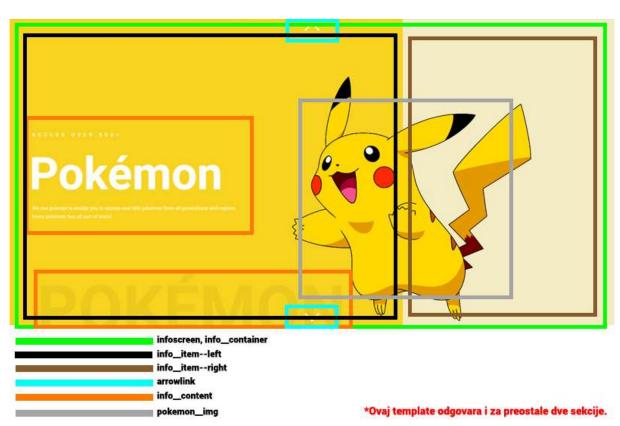

Сав садржај приказан на страницама које приказују информације о покемонима урађен је помоћу JQuery-ja, AJAX-a и JSON response-а добијеног од PokéAPI RESTful API-ja.

Покедекс страница поседује претрагу урађену помоћу горе поменутог API-ja.

1.3. Template

1.3.1. Landing Page Template

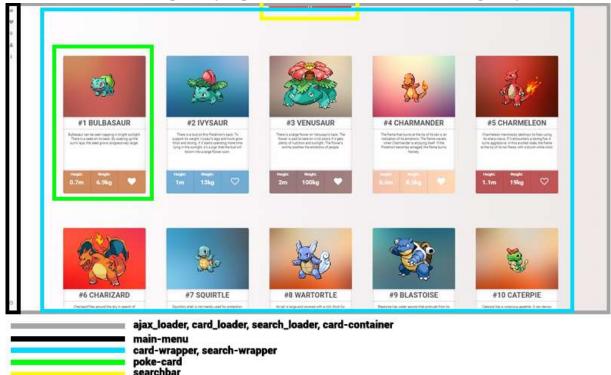

```

2. Организација

2.1. Организациона шема

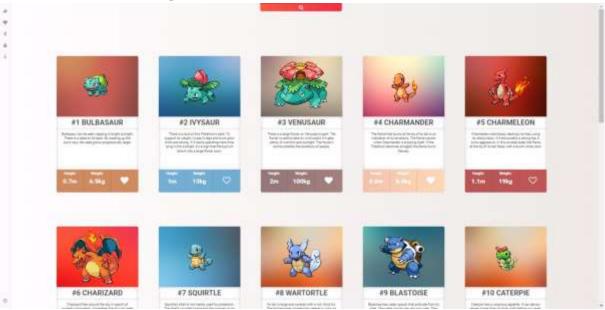

2.2. Слике страница и описи функционалности

Поседује дугме за логовање или као обичан корисник или као администратор. Ова страница садржи кратке информације о сајту.

2.2.2. UserPanel Pages

User panel странице се састоје од главног дела за представу садржаја и менија за навигацију међу странама којима корисник може да приступи.

- Pokedex страница има листу покемона сортираних по броју, опцију за претрагу као и картице са покемонима које на клик отварају велику картицу са свим информацијама о изабраном покемону, или додавање одабраних покемона у Favourites кликом на срце које се налази на картици.
- Favourties страница такође поседује картице са покемонима али само оних које је на којима је корисник кликнуо на срце. Ова страница нема претрагу.
- Regions страница је једина страница која податке не вуче из APIја већ из базе података.
- AboutMe страница поседује информације о аутору сајта.

Ова страница на дну главног менија има опцију да се корисник излогује.

2.2.3. AdminPanel Pages

Admin panel странице се састоје од главног дела за представу садржаја и менија за навигацију међу странама којима само администратор може да приступи.

- Users страница има листу свих корисника регистрованих на сајт као и опције да се корисници избришу, додају, као и да им се промени улога(обичан корисник може да се унапреди у администратора и обрнуто).
- Card Backgrounds страница приказује све позадине које се динамички поставлјају на картице са покемонима, могуће је додати нове позадине или избрисати постојеће.
- Regions страница приказује информације о свим картицама са регијама као и могућност да се нове регије додају или постојеће избришу.
- AboutMe страница приказује тренутне информације које се приказују на страници о аутору. Могуће је изменити постојеће податке.

Ова страница на дну главног менија има опцију да се администратор излогује.
